Applicant(s)

NACHT, RICHARD H.

Examiner

Lalita M Hamilton

Art Unit

3624

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-20 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. ____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 10-11 and 17-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Freeman et al (US 2002/0059137).

Freeman discloses an online mortgage application processing and tracking system comprising a receiver device for receiving mortgage approval application data from a borrower device, wherein the mortgage approval application data is entered into the borrower device by an individual borrower (p.3: 33 to p.4: 39); an application creating module for creating a plurality of mortgage approval applications comprising the mortgage approval application data (p.4: 39-40); a forwarding module for forwarding the plurality of mortgage approval applications to a plurality of mortgage underwriting systems, wherein each mortgage underwriting system receives at least one of the plurality of mortgage approval applications (p.4: 39-40); a receiving module for receiving at least one decision from at least one of the plurality of mortgage underwriting systems, the at least one decision based on the mortgage approval application (p.6: 58); a transmitter forwarding device for forwarding the at least one decision to the borrower

device (p.6: 58); creating a plurality of mortgage approval applications further comprises formatting each mortgage approval application based on the format required by each mortgage underwriting system and forwarding the plurality of mortgage approval applications further comprises forwarding to each mortgage underwriting system the mortgage approval application created in the format for that mortgage underwriting system (p.4: 46 to p.5: 48); a questions module for presenting a questionnaire to the individual, wherein the mortgage approval application data received is generated at the end user device in response to the questionnaire (p.2: 16 and p.3: 38—filling in data during application process); and the mortgage approval application decision facilitates obtaining a mortgage loan from a financial lender (p.6: 58).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-3, 5, 7-9, 12, 14, 16, and 19-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Freeman in view of Lebda (6,611,816).

Freeman discloses an online mortgage application processing and tracking system comprising receiving mortgage approval application data from an end user device, wherein the mortgage approval application data is entered into the end user device by a borrower (p.2: 16); forwarding the mortgage approval application to a plurality of mortgage underwriting systems, wherein each mortgage underwriting system receives at least one of the plurality of mortgage approval applications (p.2: 16, 21; p.3: 38; and p.5: 57); receiving at least one decision from at least one of the plurality of mortgage underwriting systems, the at least one decision based on the mortgage approval application (p.6: 58); forwarding the at least one decision to the borrower device (p.6: 58); formatting each mortgage approval application based on formatting for each mortgage underwriting system and forwarding to each mortgage underwriting system the mortgage approval application created in the format for that mortgage underwriting system (p.4: 46 to p.5: 48—may be done with software); the at least one decision comprises a universal approval of a mortgage loan program and terms and conditions of the mortgage loan program (p. 6: 60); presenting a questionnaire to the individual, wherein the mortgage approval application data received is generated at the end user device in response to the questionnaire(p.3: 33 and p.4: 39—during application process); the at least one mortgage approval application decision comprises a universal approval, a mortgage loan program and the terms and conditions of the mortgage loan program (p.6: 60 and p.7: 73-74); forwarding the mortgage approval

application to a plurality of mortgage underwriting systems, wherein each mortgage underwriting system receives one of the plurality of mortgage approval applications (p.2: 16, 21; p.3: 38; and p.5: 57); receiving at least one decision from at least one of the plurality of mortgage underwriting systems, wherein the at least one decision is based on the mortgage approval application (p.6: 58); forwarding the at least one decision to the borrower device, wherein the at least one decision comprises at least one universal approval, designation of at least one mortgage loan program, the terms and conditions of the designated at least one mortgage program, and an indication of the best fit mortgage loan program for the borrower (p.6: 60 and p.7: 73-74); the mortgage approval application decision facilitates obtaining a mortgage loan from a financial lender (p.6: 60); a receiver device for receiving mortgage approval application data from a borrower device, wherein the mortgage approval application data is entered into the borrower device by an individual borrower (p.2: 16); a forwarding module for forwarding the mortgage approval application to a plurality of mortgage underwriting systems, wherein each mortgage underwriting system receives the mortgage approval application created in the format required for that mortgage underwriting system (p.2: 16, 21; p.3: 38; and p.5: 57); a receiving module for receiving at least one decision from at least one of the plurality of mortgage underwriting systems based on the mortgage approval application (p.6: 58); and a transmitting device for forwarding the at least one decision to the borrower device, wherein the decision comprises at least one universal approval, designation of at least one mortgage loan program, the terms and conditions of the designated at least one mortgage program, and an indication of the best fit mortgage

loan program for the borrower (p.6: 60 and p.7: 73-74). Freeman does not disclose creating a plurality of mortgage approval applications comprising the mortgage approval application data; the mortgage approval application decision further comprises a universal non-limited mortgage approval; or an application-creating module for creating a plurality of mortgage approval applications comprising the mortgage approval application data. Lebda teaches a method and computer network for coordinating a loan over the Internet comprising creating a plurality of mortgage approval applications comprising the mortgage approval application data (col.1, lines 60-65 and col.3, lines 10-35); the mortgage approval application decision further comprises a universal non-limited mortgage approval (col.1, lines 60-65 and col.5, lines 30-45—sends application to all lenders to match with criteria and non-limiting in number that may match the criteria to make offer); and an application-creating module for creating a plurality of mortgage approval applications comprising the mortgage approval application data (col.1, lines 60-65 and col.3, lines 10-35). It would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate the steps of creating a plurality of mortgage approval applications comprising the mortgage approval application data; the mortgage approval application decision further comprises a universal non-limited mortgage approval; and an application-creating module for creating a plurality of mortgage approval applications comprising the mortgage approval application data, as taught by Lebda into the system and method disclosed by Freeman, to increase the exposure of the borrower's application to a plurality of lenders at once to increase their chances of obtaining the type of product desired.

Claims 4, 6, and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Freeman and Lebda as applied to claims 1, 3, and 12 above, and in further view of Ahuja (US 2002/0013711).

Freeman discloses and Lebda teaches the invention substantially as claimed; however, neither reference discloses nor teaches the at least one decision further comprises a decision format selected by the individual, wherein the individual selects at least one of the group of: a) the terms and conditions from a predetermined underwriting system; b) a link for connecting the at least one mortgage approval application decision to an appropriate lender; and c) a link for accessing an appropriate lenders website. Ahuja teaches a method of notifying customers comprising a decision format selected by the individual, wherein the individual selects at least one of the group of: a) the terms and conditions from a predetermined underwriting system; b) a link for connecting the at least one mortgage approval application decision to an appropriate lender; and c) a link for accessing an appropriate lenders website (p.1: 6 and p.4: 41-42). It would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate a decision format selected by the individual, wherein the individual selects at least one of the group of: a) the terms and conditions from a predetermined underwriting system; b) a link for connecting the at least one mortgage approval application decision to an appropriate lender; and c) a link for accessing an appropriate lenders website, as taught by Ahuja into the system and methods disclosed by Freeman and taught by Lebda, in order to allow the user to select the most convenient mode of notification for their schedule.

Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Freeman in view of Ahuja.

Freeman discloses the invention substantially as claimed; however, Freeman does not disclose at least one decision further comprises a decision format selected by the individual, wherein the individual selects at least one of the group of: a) the terms and conditions from a predetermined underwriting system; b) a link for connecting the at least one mortgage approval application decision to an appropriate lender; and c) a link for accessing an appropriate lenders website. Ahuja teaches a method of notifying customers comprising a decision format selected by the individual, wherein the individual selects at least one of the group of: a) the terms and conditions from a predetermined underwriting system; b) a link for connecting the at least one mortgage approval application decision to an appropriate lender; and c) a link for accessing an appropriate lenders website (p.1: 6 and p.4: 41-42). It would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate a decision format selected by the individual, wherein the individual selects at least one of the group of: a) the terms and conditions from a predetermined underwriting system; b) a link for connecting the at least one mortgage approval application decision to an appropriate lender; and c) a link for accessing an appropriate lenders website, as taught by Ahuja into the system and method disclosed by Freeman, in order to allow the user to select the most convenient mode of notification for their schedule.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ahuja (US 2002/0013711 A1).

Provisional Application Listed on PTO-892 form

... If a copy of a provisional application listed on the bottom portion of the accompanying Notice of References Cited (PTO-892) form is not included with this Office action and the PTO-892 has been annotated to indicate that the copy was not readily available, it is because the copy could not be readily obtained when the Office action was mailed. Should applicant desire a copy of such a provisional application, applicant should promptly request the copy from the Office of Public Records (OPR) in accordance with 37 CFR 1.14(a)(1)(iv), paying the required fee under 37 CFR 1.19(b)(1). If a copy is ordered from OPR, the shortened statutory period for reply to this Office action will not be reset under MPEP § 710.06 unless applicant can demonstrate a substantial delay by the Office in fulfilling the order for the copy of the provisional application. Where the applicant has been notified on the PTO-892 that a copy of the provisional application is not readily available, the provision of MPEP § 707.05(a) that a copy of the cited reference will be automatically furnished without charge does not apply.
